

**INTALENT RESEARCH PROGRAMME
CALL FOR PROPOSALS 2018**

A Coruña, 25 April 2018

The University of A Coruña (UDC), in partnership with Inditex, invites applications from suitable candidates for research grants under the InTalent programme. InTalent is a new research support initiative by UDC and Inditex, based on the sole criterion of scientific excellence and aimed at attracting postdoctoral research talent with extensive international experience and standing.

As part of the company's growing presence in higher education institutions, including its flagship collaboration with UDC, Inditex is actively committed to initiatives aimed at supporting research and knowledge transfer projects for the expansion, improvement and modernisation of learning systems at third level, and maximising the enterprise potential of higher education for the benefit of society as a whole.

In addition to its teaching and research activities, UDC is also obliged, in consonance with its purpose and objectives as a public institution, to establish effective networks of cultural and scientific exchange and communication between members of the university community, for the development of skilled professionals, researchers, teachers and technical workers, and the enhancement of social and cultural well being.

UDC and Inditex believe that scientific, cultural and technological cooperation in the field of research and development, and the practical utilisation of knowledge, can and should be harnessed for the common good. To that end, they are committed to strengthening the University's research capacity and talent strategies by attracting professionals with a strong international reputation and outstanding research track record to join the academic community at UDC.

The aim of the InTalent programme is to encourage researchers with an existing or recent link to UDC to remain at or return to the University, and to attract new research talent from other parts of Spain and around the world. The programme is targeted at researchers capable of attracting competitive international research funding, with an effective research and communication proposal that promises a positive scientific and socio-economic impact.

I. PURPOSE

1. The purpose of the InTalent programme is to attract, create, retain and recover innovative scientific talent for UDC, to help foster a climate of scientific and research excellence at the University. The scheme is aimed at researchers of any nationality wishing to pursue their research activities at UDC.

2. The aim of this call is to initiate a competitive contracting process for two recognised researcher positions, in accordance with the principles of public notice and objectivity provided in Article 23 of the Science, Technology and Innovation Act, 14/2011 (1 June; BOE n°131, 2 June 2011). The process will be conducted in compliance with the objectives defined by the European Union under the OTM-R (Open, Transparent, Merit-based) model for the recruitment of researchers. UDC has also been awarded the 'HR Excellence in Research' badge by the European Commission, in recognition of its commitment to providing and supporting a stimulating, research-friendly environment.

3. The aim of the scheme is to offer support to all Excellent Science projects without exclusion, irrespective of discipline or specialisation. Notwithstanding, the selection process will also take into account the feasibility of carrying out the project at UDC, the extent to which proposals coincide with the goals stated in the ‘RIS3 in Galicia’ plan (www.ris3galicia.es), and the following research areas, prioritised by UDC on the basis of their emergent nature, academic projection and strategic importance in relation to the current University development plan:

a) UDC Technology Park

- CITIC: Centre for Information and Communications Technology Research (www.citic.udc.es)
- CITEEC: Centre for Building and Civil Engineering Technology (www.udc.gal/citeec)
- CICA: Centre for Advanced Scientific Research (<http://cica.udc.es>)
- CIT: Centre for Technological Research (www.udc.gal/cit)

b) Specialist Research Campuses

- Industrial Campus (<http://campusindustrial.udc.gal>)
- Innova Campus
- Sustainable Development Campus

c) University Research Institutes (www.udc.es/investigacion/institutos_investigacion).

d) Humanities and Social Sciences

II. CONTRACT DETAILS

1. The contract will remain in effect for a period of two years, with the possibility of a one-year renewal. The contract will be renewed automatically, subject to receipt of a request for renewal from the researcher between three and six months prior to completion of the original contract term. In the event of long-term sickness absence, temporary incapacity leave, maternity or paternity leave, high-risk pregnancy, fostering or adoption, risks during lactation period, the contract validity could be extended for a period of time equal to the time of leave duly accredited by the researcher.

2. Researchers will be paid a total contract sum of 60,000 Euros per year, including gross salary, social insurance and final pay.

3. Researchers will receive additional funding in the amount of 10,000 Euros during each year of the contract to cover the costs of starting up their line of research.

This additional funding will be used to cover justifiable expenses in relation to:

- acquisition, leasing, transport, maintenance and/or repair of technical and scientific equipment (including computer equipment and technical software), bibliographical material, consumables, supplies and other products;

- adaptation of scientific-technical infrastructures
- travel and subsistence expenses, fees and/or expenses related to the attendance and/or organization of scientific congresses, seminars and conferences
- access to and use of the Unique Scientific and Technical Infrastructures (*ICTS – Infraestructuras Científicas y Técnicas Singulares*) included in the official ICTS Map approved by the Spanish government Science, Technology and Innovation Policy Committee, and other large national and international scientific facilities;
- filing, prosecution and maintenance of industrial and intellectual property rights, patent licence and assignment fees for specialist knowledge acquired and obtained from external sources at market prices;
- hiring costs and expenses of specialist advice and assistance in relation to research, innovation and knowledge transfer;
- publication and dissemination of research outcomes (including open-access publications);
- other costs, such as the use of university support and administration offices and general research services.

All expenses must be directly related to the research project selected for funding under the InTalent programme.

4. Researchers will be provided with a suitable work space in which to carry out their research activities.

5. At the beginning of the contract term, researchers will receive an additional one-off payment in the amount of 1,000 Euros (gross) for initial living expenses.

6. The body responsible for administering the InTalent programme, the UDC Office of Research and Knowledge Transfer (OTRI), will provide researchers with specialist advice and assistance throughout the lifetime of the contract, to help ensure the necessary climate of research excellence in which to carry out their work.

7. The InTalent research programme is financed under budget heading 050501.541A.64000.

III. APPLICANT PROFILE

The selection process is open to candidates with a PhD who meet the eligibility criteria provided in Section IV below. Ideal candidates for InTalent research grants should demonstrate the following attributes and experience:

- Excellent recent research track record and ability to generate new knowledge;
- Professional maturity, ability to work independently and potential to build and maintain a strong research reputation;

- Ability and willingness to participate in other national and international Excellent Science funding schemes, such as European Research Council (ERC) Starting and Consolidator grants, Spanish Ministry of Economy and Competition ‘State Programme for the Promotion of R&D&I Talent and Employability’ schemes (e.g. Ramón y Cajal), alternative funding streams within the H2020 programme, and competitive funding opportunities operated by other international agencies.

IV. ELIGIBILITY CRITERIA

Applicants will be required to meet the following criteria:

- Possession of a PhD awarded, at least, three years prior to the date of publication of the call for proposals provided herein. The date of award will correspond to the date of thesis examination and approval by the examination board. For candidates with more than one PhD, the provisions of this paragraph will apply to the earlier (or earliest) date of award.
- Fulfilment of current eligibility criteria for ERC Starting or Consolidator calls.
- Minimum 24-month research placement in R&D institutions outside of the country of the PhD awarding institution, to be completed prior to the date of publication of the call for proposals provided herein. Total placement may be an aggregate of multiple mobility periods lasting no less than one month each. Applicants in possession of a PhD completed in a university outside of their own country will be deemed to have met the international mobility requirement provided in this section.

V. SUBMISSION OF APPLICATIONS

1. The applications period will run from 08:30 am (Spanish peninsular time) on 3 May 2018 to 14:30 pm (Spanish peninsular time) on 28 June 2018.
2. All applications will be submitted using the online submissions system accessible through the UDC Online Services page at <https://sede.udc.gal/applications/intalent2018>. Applications submitted by any other method will not be considered.
3. All applications must include the following documentation:
 - a) Technical report (see template provided in Appendix). The technical report should be completed using Times New Roman font (or similar), font size 11 point, single line spacing, upper and lower margins 1.5cm (min.), and side margins 2cm (min.)
 - i.1) Administrative form, including personal details and links to research databases or registries with updated access to research outputs of the candidate (e.g. ORCID, ResearchGate, Scopus, Web of Science, Google Scholar). Candidates are also required to match their proposal to one of the three main ERC funding domains:
 - Physical Science and Engineering
 - Life Sciences
 - Social Sciences and Humanities

a.2) Declaration of all individual awards from Excellent Science funding schemes since award of PhD. Candidates may also provide details of unsuccessful applications for individual Excellent Science grants (e.g. ERC, Ramón y Cajal, etc.), including the outcome in each case (e.g. reserve list, score, withdrawal of application, etc.), if relevant to this application.

Candidates should also include details of any individual Excellent Science funding schemes applications pending, and will undertake to notify the InTalent Programme Coordinator by email (intalent@udc.es) of any developments or changes in those applications which may affect their InTalent application.

a.3) List of research placements, in fulfilment of the conditions provided in Section IV. Only research placements stated here will be counted towards the mobility requirement stipulated in Section IV.

a.4) Research track record, detailing the applicant's most significant research achievements to date (max. 2 pages).

a.5) Summary of research proposal ('Project') to be carried out during the term of the contract (max. 2 pages). Research proposals should provide a detailed description of the research the candidate intends to carry out during the contract period, and explain how it relates to their research idea for future ERC funding calls.

a.6) Summarised curriculum vitae (max. 2 pages). Optionally, candidates may also choose to submit a longer, more detailed version of their CV using the 'Other documents' section of the online submissions portal.

a.7) Declaration by candidate that the information supplied is accurate and true, together with a signed commitment during the lifetime of the contract to submit applications for ERC and Spanish Ministry of Economy and Competition 'State Programme for the Promotion of R&D&I Talent and Employability' funding schemes in representation of and in consultation with UDC.

b) Copy of applicant ID (DNI) or Foreign National Identity document (NIE), or copy of valid passport (non-Spanish nationals only).

c) Copy of PhD degree certificate or academic transcript containing the date of PhD award.

d) Other documents which may help to complete the information provided elsewhere in the application (e.g. personal statement, full-length CV). 4. Applications may be made in English, Spanish or Galician, though applicants are recommended to complete the Technical Report in English.

5. Applications will be assessed on the sole basis of the information contained in the documentation supplied as of the deadline for receipt of applications.

6. Applications which fail to meet the stated programme and applicant criteria, or which are found to contain fraudulent, misleading and/or partial information, will be automatically excluded from the selection process.

7. By participating in the grant process, candidates will be deemed to have read and accepted the terms and conditions of the programme, and consented to the use, disclosure and communication to third parties of the personal information contained in their application for subsequent historical, scientific or statistical purposes in accordance with the Protection of Personal Information Act, 15/1999 (13 December; BOE n°298, 14 December 1999).

VI. RECTIFICATION OF INACCURACIES AND OMISSIONS

1. Following the close of applications, the Vice-President for Science Policy, Research and Knowledge Transfer will announce a list of provisionally eligible and excluded candidates. Excluded candidates will have a period of ten working days as from publication of the list to appeal the decision against their application.

2. The decision of the Vice-President will be published on the official message board of the UDC Online Services page (https://sede.udc.gal/services/electronic_board). The provisional acceptance of a candidate will in no way be construed as an acknowledgement of the candidate's fulfilment of the criteria required to participate in the selection process.

3. Candidates who fail to rectify the errors or omissions detected in their proposal within the time frame provided will be deemed to have withdrawn from the application process, in accordance with the terms provided in section 68 of the Public Administration Common Administrative Procedures Act, 39/2015 (1 October; BOE n°236, 2 October 2015). The final list of eligible and excluded candidates will be published on the official message board of the UDC Online Services page (https://sede.udc.gal/services/electronic_board). Candidates who are unsatisfied with the outcome of their application will be entitled to lodge an administrative appeal with the Office of the President within a period of one month as from the day after the date of publication of the decision on the official message board of the UDC Online Services page, in accordance with sections 121 and 122 of the Public Administration Common Administrative Procedures Act, 39/2015 (1 October; BOE n°236, 2 October 2015).

VII. PROJECT PRINCIPLES

1. The programme is open to basic and applied research projects in any area of knowledge, subject to the additional considerations provided above in subsection I.3.

2. To further the programme's particular concern with bridging the gap between science and society, proposals should also include a short communication strategy for both the scientific and social communities.

3. All actions and activities undertaken by researchers in the course of the contract announced herein will comply with the principles and regulations of international, Spanish and Galician law in relation to bioethics, animal testing, biosafety, biosecurity, protection of the environment, biodiversity and natural heritage, and protection of information.

VIII. ASSESSMENT CRITERIA

1. Applications will be assessed in accordance with the following criteria:

a) Scientific track record. Applicants will be assessed based on the prominence and influence of their work in scientific journals (citations, impact factor, etc.), scientific and/or specialist books and chapters, conference papers, patents granted and licensed, and any other evidence of the candidate's contribution to research, including transfer of technology. Track record will be assessed in accordance with the general assessment criteria for the I3 Research Activity Incentivisation, Intensification and Inclusion Programme, provided in Resolution of the Department of Education and Research (20 July 2005), appendix I, section 2, paragraphs a-f (BOE n°204, 26 August 2005). Points: 0-50.

b) International activity. Applicants will be assessed based on their direct participation in international programmes, projects and contracts, funding obtained through competitive international grant schemes, and international mobility (including pre- and postdoctoral experience outside of the candidate's country of origin). Points: 0-10.

c) Leadership capacity in relation to own line of research and generation of new knowledge, based on professional scientific experience and personal track record. Applicants will be assessed based on their research leadership record (including researcher training and development, lead authorship of scientific publications, PhD supervision, etc.), prominence and influence of their research project (including invitations to international conferences, plenary speaking engagements, prizes, honours and distinctions), fundraising capacity (funding obtained as principal investigator for projects, contracts, etc.), participation in knowledge networks, and any other aspects of the candidate's record which demonstrate independence, influence and leadership in their line of research. Points: 0-20.

d) Project proposal. Proposals will be assessed based on the purpose, impact and excellence of the research proposed, together with the viability of the plan and its implementation, the importance it represents in the candidate's research career and its consistency with the candidate's career to date. Assessment will also take into account the extent to which proposals conform to the priorities provided in subsection I.3 and the objectives of the InTalent programme, particularly in relation the candidate's ability to attract competitive national and international Excellent Science research funding. Assessment will also take into account the communication strategies proposed for the dissemination of research outcomes. Points: 0-20.

2. The assessment of proposals in accordance with the merits provided in this section will take into account the length of time since the candidate was awarded their PhD. Candidate achievements, reputation and fundraising capacity (in relation to other national and international Excellent Science programmes and initiatives) will therefore be assessed in relation to the candidate's experience.

IX. ASSESSMENT OF APPLICATIONS

1. Proposals will be assessed in accordance with the criteria provided in Section VIII by an Assessment Panel chaired by the Vice-President for Science Policy, Research and Knowledge Transfer. The panel will comprise: the Deputy Vice-President for Research, the Deputy Vice-President for Knowledge Transfer, and three researchers of high standing to be appointed by the University President. Meetings of the Assessment Panel will also be attended by the InTalent Research Coordinator, who will serve as a non-voting participant in the panel's deliberations.
2. Each application will be assessed initially by at least two members of the panel. If necessary, the panel may also seek specialist expertise in particular areas to assist in its deliberations.
3. Candidates may be contacted or interviewed by the Assessment Panel and/or InTalent Programme Coordinator at any time during the assessment period, to clarify details of their qualifications and achievements and provide additional information as necessary. No additional points will be awarded for any such exchanges or interviews.
4. The Assessment Panel will decide on a provisional list of successful candidates (and reserve candidates, as appropriate), based on the overall score obtained by each proposal. The list will be published on the message board of the UDC Online Services page (https://sede.udc.gal/services/electronic_board). Unsuccessful candidates will have a period of ten working days as from publication of the list to submit their objections to the panel's decision. All challenges received will be reviewed by the Assessment Panel.
5. Reserve candidates will be listed in descending order of points obtained.
6. Following publication of the decision, candidates will be informed individually by email (using the email address provided in the application) of their scores in each assessment category and any comments the Assessment Panel may have.

X. COMPLETION OF SELECTION PROCESS

1. Following review of any claims or objections received, the Evaluation Panel will present its recommendation to the University President. The final decision will be announced on the message board of the UDC Online Services page (https://sede.udc.gal/services/electronic_board).
2. Successful candidates will have a period of fifteen working days as from publication of the list of awardees to provide evidence of their compliance with the programme requirements and of all merits claimed in their application. Failure to certify merits or compliance within the time frame provided will result in the candidate's permanent exclusion from the process and their substitution by the first eligible candidate on the reserve list.
3. The final result of the selection process will not be subject to administrative appeal. Candidates who are unsatisfied with the outcome of their application will be entitled to challenge the result of the process: either by a request for reconsideration, to be lodged

with the Office of the President within a maximum period of one month as from the day after the date of publication of the decision on the official message board of the UDC Online Services page, in accordance with sections 123 and 124 of the Public Administration Common Administrative Procedures Act, 39/2015 (1 October; BOE n°236, 2 October 2015); or by a direct appeal for judicial review, to be lodged within a maximum period of two months as from the day after the date of publication of the decision on the official message board of the UDC Online Services page, in accordance with section 46 of the law governing judicial review jurisdiction, 29/1998 (13 July; BOE n°167, 14 July 1998).

4. Successful candidates will be required to commence their UDC contract within a maximum period of thirty days as from publication of the list of awardees. Candidates may apply to the Office of the Vice-President for Science Policy, Research and Knowledge Transfer for an extension of the deadline for commencement of the contract by a maximum period of six months as from the day following the date of publication of the list of awardees. In exceptional, justified cases, a candidate may apply for a further extension to this deadline, to be decided at the discretion of the Vice-President for Science Policy, Research and Knowledge Transfer.

XI. OBLIGATIONS OF AWARDEES

1. Awardees will undertake to comply with all of the regulations and specific obligations of the InTalent funding scheme announced herein and to provide the Office of the Vice-President for Science Policy, Research and Knowledge Transfer with any information required regarding the execution and performance of the contract.

2. Upon completion of the contract, awardees will be required to submit a scientific/technical report detailing all of the activities undertaken as part of the contract.

3. Awardees will be required to comply with the following specific obligations during the term of the contract:

- Carry out the research project presented in their application at UDC.
- Comply with all of the general obligations and regulations governing research personnel at UDC.
- Collaborate and participate in training, dissemination and communication activities in relation to the awardee's own research project and the broader InTalent programme.
- Participate in forums and committees for the improvement and appraisal of activities relating to the InTalent programme.
- Include specific mention of Inditex and acknowledgement of receipt of funding under the InTalent programme in all references to research carried out under the contract (media coverage, conferences, publications, etc.)

- Submit applications in representation of and consultation with UDC for national and international Excellent Science funding schemes, such as ERC grants or the Spanish Ministry of Economy and Competition ‘State Programme for the Promotion of R&D&I Talent and Employability’. Failure to comply with this commitment will result in cancellation of the contract and all associated funding, and recovery of all sums paid to date, unless otherwise agreed between UDC and the awardee.

XII. BREACH OF CONTRACT

Concealment or falsification of information, or failure to comply with the requirements, obligations or regulations (or part thereof) provided in this announcement and the final funding decision (if applicable), will result in cancellation of the contract and recovery of all sums paid to date.

XIII. DUPLICATE FUNDING

Awardees will inform UDC of any additional grants, subsidies, income or resources as soon as they receive notice thereof. In all cases, awardees will inform UDC of the aforementioned prior to the reporting of expenses for reimbursement.

Research placements away from UDC during the lifetime of the contract will be limited to a maximum three months per year, subject to submission of a formal, justified request and approval thereof by the Vice-President for Science Policy, Research and Knowledge Transfer. In exceptional, justified cases, the Vice-President may authorise research stays of longer duration, subject to submission of a formal, justified request and proof of the placement’s particular relevance to the research project.

XIV. NOTIFICATIONS

In accordance with section 45 of the Public Administration Common Administrative Procedures Act, 39/2015 (1 October) and sections 13 and 14 of the regulations governing the creation and development of a UDC online services platform (DOG n°241, 17 December 2014), the sole method of notification will be via the official message board of the UDC Online Services page (https://sede.udc.gal/services/electronic_board).

XV. APPEALS

Candidates who are unsatisfied with the outcome of their application will be entitled to challenge the result of the process, either by a request for reconsideration by the Office of the President (to be lodged within a time frame of one month), in accordance with sections 123 and 124 of the Public Administration Common Administrative Procedures Act, 39/2015 (1 October), or by a direct appeal for judicial review (to be lodged within a

time frame of two months), in accordance with section 46 of the law governing judicial review jurisdiction, 29/1998 (13 July).

The English translation of this call document will be for reference purposes only. The main call document will correspond to the versions in Galician and Spanish found on the official message board of the UDC Online Services page (https://sede.udc.gal/services/electronic_board).
